Sreeya V. Sangaraju

13333 Regal Crest Dr Clifton, VA 20124| 5713656868 | ssangaraju9@gatech.edu | U.S. Citizen

Objective

Electrical Engineering student specializing in power systems, with hands-on research experience in solar technology and a strong interest in circuit design and analysis. Skilled in applying engineering fundamentals to real-world power challenges and experienced in leading technical teams to deliver results under tight deadlines. Seeking a research or internship opportunity in power systems for Summer 2027.

Education

Georgia Institute of Technology | Atlanta, GA *August 2026 – Present*
Bachelor of Science in Electrical Engineering Expected Graduation, May 2030

Skills

Programming: Java, Python, HTML, C/C++ (Arduino), Microsoft Office (Excel, Word, Powerpoint)
Software: GitHub, Arduino IDE
Professional Organizations: Georgia Tech Society of Women Engineers, Women in Electrical & Computer Engineering
Communication: Design proposals, technical reports, presentations (large and small audiences)
Languages: Telugu (native), English (fluent), Spanish (proficient)

Projects

Wild S.T.R.I.K.E. | C-Tech^2 Program @ Virginia Tech *July 2025*
Co-Designer & Project Manager
Led a 4-person team through the design, prototyping, and testing of an accessible wildfire-prevention kit.

- Created a concentrate formula that extinguishes campfires 82% faster than traditional methods
- Programmed an Arduino-based monitor to track temperature, oxygen, and smoke levels in real time
- Achieved 3rd Place, Engineering Design Project Award, presented by Bloomberg Industries & praised for innovation

Analyzing Machine Learning in Predicting Water Quality | Regional Science Fair *September 2024 – May 2025*
Student Researcher
Applied machine learning to predict water quality for underserved communities lacking historical monitoring data, aiming to deliver a low-cost tool.

- Preprocessed & visualized regional water quality datasets in Python; implemented time-decay factor to improve model accuracy
- Coded and benchmarked multiple machine learning algorithms, improving predictive accuracy by ~18%
- Won 1st Place & $200, Regional Stockholm Jr. Water Prize Competition

Experience

Virginia Tech Engineering & Computer Science Internship | Alexandria, VA *June 2025 – Present*
STEM Research Intern & Assistant
Program giving high schoolers hands-on experience in engineering research & mentorship from college graduates/alumni.

- Writing a next-generation solar technology paper for IEEE submission alongside a graduate researcher
- Authored 3+ blog posts on solar panel technology and applications, educating 40+ interns on renewable energy fundamentals
- Analyzed electrical consumption data for the intern building to identify efficiency opportunities

Mathnasium | Centreville, VA *July 2025 – April 2026*
Instructor / Mentor
Math learning center providing personalized instruction to K-12 students.

- Taught mental math strategies and problem-solving techniques to 25+ students, building confidence and academic performance
- Customized and adjusted individualized learning plans for 10+ students to accelerate progress toward grade-level benchmarks

Relevant Coursework

Fundamentals of Digital Design: Boolean algebra, gate-level design, sequential logic, finite state machines, memory design

Leadership

AI Club @ Centreville High School | President *January 2025 – June 2026*

- Designed & presented tutorials on machine learning, data science, and artificial intelligence tools, improving technical skills for 10+ students
- Provided 20+ free resources for certification, resume-building, career enrichment
